

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	28 September 2026
Team ID	6ab2210011b716a3e52c62c6
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming for this project focused on identifying common IT procurement challenges and generating practical ideas to streamline the process. The team explored ways to reduce manual work, improve request handling, standardize laptop orders, and provide a consistent procurement workflow using ServiceNow Flow Designer.

The ideas were grouped around procurement problems, automation approaches, request and catalog tasks, and process tracking. The final concept selected was to automate standard laptop orders through a ServiceNow Flow Designer workflow.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

From manual requests to automated flow — faster, simpler, smarter IT procurement.

This project uses ServiceNow Flow Designer to automate the standard laptop ordering process. It reduces manual effort, ensures policy compliance, and helps IT and employees get the required devices quickly and efficiently.

- Platform**
ServiceNow
- Feature Used**
Flow Designer
- User Type**
IT / Employees (Requesters)
- Goal**
Automate standard laptop orders and streamline IT procurement

➔

1 Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

Understand the business need

Identify the problem of manual laptop procurement and the need for automation.

Define the flow

Decide the trigger, approval steps, and actions required for standard laptop orders.

Configure Flow Designer

Build the flow with Service Catalog trigger, create catalog task, and set up approval and notification actions.

Test and activate

Run test orders, validate the process, and activate the flow for real use.

[Open ServiceNow](#) ➔

1 Define your problem statement

Manual laptop procurement is time-consuming, prone to errors, and involves multiple approvals. We need to automate the standard laptop order process using Flow Designer in ServiceNow.

🕒 5 minutes

The Solution

Create a flow in Flow Designer with a Service Catalog trigger to automatically create a catalog task, run approvals, and place the laptop order for standard models.

Key Benefits

🕒 Faster processing of laptop requests

🛡️ Ensures policy compliance

👥 Reduces manual effort and errors

🎯 Standardizes laptop orders

📈 Improves visibility & tracking

😊 Better experience for employees

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

Problem Statement:

IT procurement for standard laptops involves manual request processing, repeated data entry, delays in task creation, and lack of process consistency. An automated solution is needed to streamline standard laptop ordering.

10 minutes

Person 1

- Automate standard laptop requests
- Reduce manual procurement work
- Create tasks automatically

Person 2

- Use ServiceNow Flow Designer
- Trigger flow from Service Catalog
- Automate request processing

Person 3

- Create a Standard Laptop Catalog Item
- Configure required laptop details
- Link request with Requested Item

Person 4

- Automatically create Catalog Tasks
- Assign tasks to IT procurement team
- Reduce processing time

Person 5

- Improve request tracking
- Maintain consistent procurement workflow
- Reduce human errors

Person 6

- Use Global application
- Use System user for flow execution
- Save and activate the flow

Person 7

- Test the laptop ordering flow
- Verify task creation
- Monitor request status

Person 7

- Provide a simple user request process
- Improve procurement efficiency
- Create a scalable automation solution

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Group 1 - Automation

- Automate standard laptop requests
- Automate request processing
- Automatically create Catalog Tasks
- Reduce manual procurement work

Group 2 - ServiceNow Flow Designer

- Use ServiceNow Flow Designer
- Add Service Catalog trigger
- Use Global application
- Use System user
- Save and activate the flow

Group 3 - Laptop Request Management

- Create Standard Laptop Catalog Item
- Capture laptop requirements
- Link Requested Item with Catalog Task
- Provide a simple request process

Group 4 - Task & Process Management

- Assign tasks to IT procurement team
- Improve request tracking
- Monitor request status
- Maintain consistent workflow

Group 5 - Benefits & Improvement

- Reduce processing time
- Reduce human errors
- Improve procurement efficiency
- Create a scalable automation solution

★ Final Selected Idea

Automating Standard Laptop Orders using ServiceNow Flow Designer

Step-3: Start Prioritisation

3 Idea Prioritisation

Prioritize the generated ideas based on importance and feasibility.

Select the ideas that provide high value and can be implemented effectively using ServiceNow Flow Designer.

Tip:

Place ideas based on their importance and feasibility. High-importance and high-feasibility ideas should be prioritized for implementation.
