

AUTOMATED IT PROCUREMENT: : STANDARD LAPTOP ORDERS VIA FLOW DESIGNER

From Request to Fulfillment: A Digital Workflow Transformation.

1. REQUEST & DISCOVERY	2. SUBMISSION & POLICY CHECK	3. CORE FLOW: AUTOMATION ENGINE	4. DELIVERY & CONFIGURATION	5. SUPPORT & LIFECYCLE
Steps  Employee needs standard laptop, logs into IT Service Portal. Interactions    Employee Catalog Manager Catalog Goals: "Help me request equipment quickly." "Help me find approved hardware." Positive moments: Clear catalog, transparent options, pre-approval logic visible Pain Points: Hidden hardware specs, confusing forms Areas of Opportunity: Optimize catalog clarity, pre-load user data	Steps   Submits request, automatic policy validation runs. Interactions  System Goals: "Help me avoid delays." "Help me get instant approval for standard items." Positive moments: Instant submission confirmation, auto-approval trigger Pain Points: Unnecessary manual manager approvals for standard items Areas of Opportunity: Refine policy automation rules	Steps    Flow Designer triggers Purchase Order (PO), updates IT Asset Management (CMDB), assigns Staging Task. Interactions   CMDB PO Laptop asset Goals: "Help me track fulfillment smoothly." "Help me provision the device efficiently." Positive moments: Real-time tracking, automated notifications to user and IT Pain Points: Vendor stockouts, API integration failures Areas of Opportunity: Enhance vendor integration, error handling	Steps    Laptop delivered to IT Staging, imaged with company software, handed to employee. Interactions  IT Tech Employee Places Staging Area Goals: "Help me get to work immediately with a ready-to-use device." Positive moments: Unboxing a fully configured laptop, no setup lag Pain Points: Missing peripherals, shipping delays Areas of Opportunity: Standardize imaging, streamline delivery	Steps    Post-deployment support, CSAT survey, eventual asset refresh. Interactions  Employee Survey Asset Tag Goals: "Help me resolve issues fast." "Help me keep hardware updated." Positive moments: Proactive warranty updates, easy feedback process Pain Points: Forgotten asset tracking leading to security risk Areas of Opportunity: Implement proactive refresh notifications
