

Project Design Phase-II
Data Flow Diagram & User Stories

Date	28 September 2026
Team ID	6ab2210011b716a3e52c62c6
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

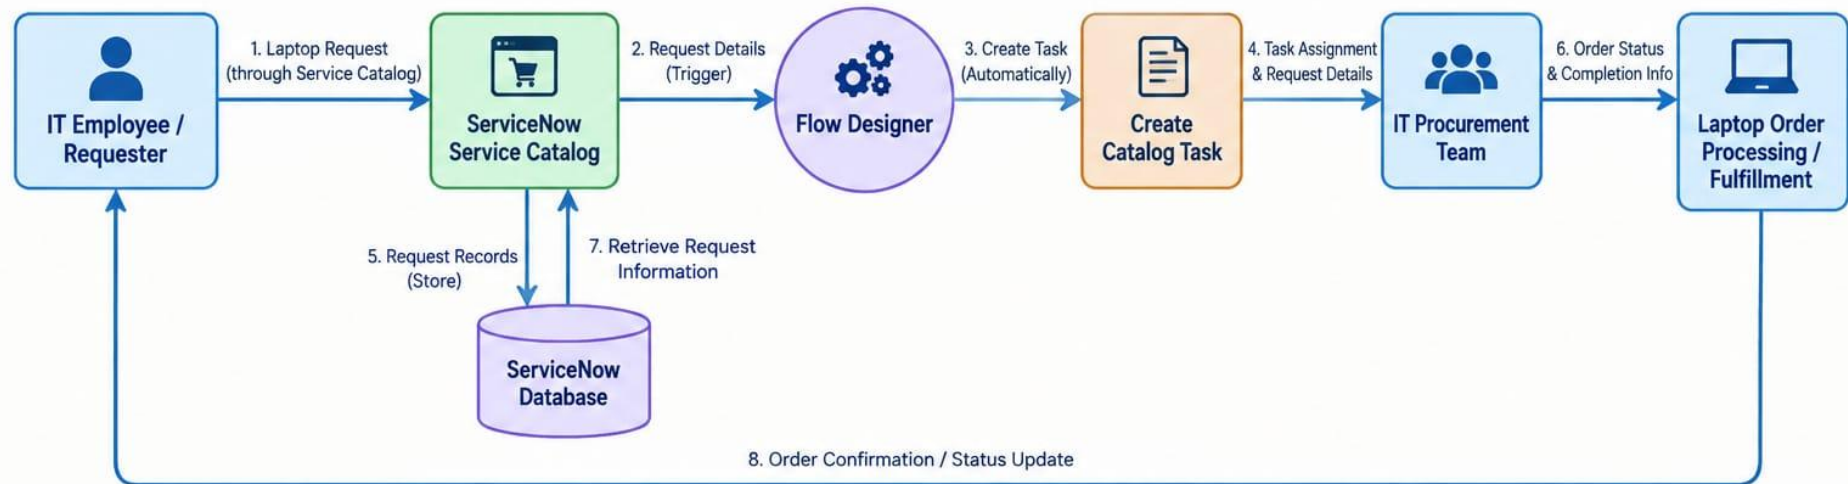

Data Flow Diagrams:

The Data Flow Diagram represents how a standard laptop request moves through the automated procurement system. The employee submits the request through the Service Catalog. The Service Catalog triggers the Flow Designer workflow, which automatically creates a catalog task for the IT procurement team. The procurement team processes the request and completes the laptop order. This reduces repeated manual work and improves the consistency of task processing.

Data Flow	Description
IT Employee → Service Catalog	Employee submits a standard laptop request
Service Catalog → Flow Designer	Request information triggers the automated flow
Flow Designer → Catalog Task	Flow creates a procurement task automatically
Catalog Task → IT Procurement Team	Task is assigned for processing
IT Procurement Team → Requester	Order status / completion information is provided

Data Flow Description

No.	Data Flow	Description
1.	IT Employee / Requester → Service Catalog	Employee submits a standard laptop request through the Service Catalog.
2.	Service Catalog → Flow Designer	Request information triggers the automated flow.
3.	Flow Designer → Create Catalog Task	Flow creates a procurement task automatically.
4.	Create Catalog Task → IT Procurement Team	Task is assigned to the IT procurement team with request details.
5.	Service Catalog → ServiceNow Database	Request records are stored in the ServiceNow database.
6.	IT Procurement Team → Laptop Order Processing	Procurement team processes the request and fulfills the laptop order.
7.	ServiceNow Database → Service Catalog	Request information is retrieved when needed.
8.	Laptop Order Processing → IT Employee / Requester	Order status / completion information is provided to the employee.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
IT Employee / Requester	Standard Laptop Request	USN-1	As an employee, I can submit a standard laptop request through the Service Catalog.	The laptop request is submitted successfully with the required details.	High	Sprint-1
IT Employee / Requester	Standard Laptop Request	USN-2	As an employee, I can provide the required information for my laptop request.	Required request details are captured correctly.	High	Sprint-1
IT Procurement Team	Automated Task Creation	USN-3	As a procurement team member, I can receive a catalog task automatically after a laptop request is submitted.	A catalog task is created automatically for the submitted request.	High	Sprint-1
IT Procurement Team	Request Processing	USN-4	As a procurement team member, I can process the standard laptop order using the created task.	The task contains the related request information needed for processing.	High	Sprint-1

IT Procurement Team	Workflow Automation	USN-5	As an IT procurement team member, I can use an automated workflow instead of manually creating repeated tasks.	Flow Designer automatically creates the required catalog task.	High	Sprint-1
Administrator	Flow Management	USN-6	As an administrator, I can configure the Standard Laptop Task flow in Flow Designer.	The flow is saved, activated, and runs when the request is submitted.	Medium	Sprint-2
Administrator	Flow Monitoring	USN-7	As an administrator, I can monitor the execution of the laptop procurement flow.	The flow execution and created task can be verified successfully.	Medium	Sprint-2
