

Project Design Phase | Problem – Solution Fit Template

Date	28 September 2026
Team ID	6ab2210011b716a3e52c62c6
Project Name	Streamlining IT Procurement: Automatic Standard Laptop Orders With Flow Designer

Filled Canvas:

1. Customer Segment(s) - New hires needing a standard laptop. - Employees needing replacement/repair. - Managers approving requests. - IT Procurement / Asset team.	2. Jobs-to-be-Done / Problems - Employee: get a working laptop fast. - Manager: approve quickly, no email chase. - IT: process, order & track without manual re-entry.
3. Triggers - New hire onboarding. - Laptop damaged/lost/EOL. - Team expansion or upgrade request.	4. Emotions: Before / After - Before: frustration, unclear status, onboarding delay. - After: confidence, transparency, trust in IT.
5. Available Solutions - Manual email/phone request to helpdesk. - Spreadsheet tracking; generic ticket, no automation.	6. Customer Constraints - Manager approval required by policy. - Limited IT staff; vendor lead time/budget cycles. - Must keep a standard configuration.
7. Behaviour - Employee emails/calls IT. - IT manually checks stock & emails manager. - IT manually raises PO, follows up by phone.	8. Problem Root Cause - No workflow links request → approval → procurement. - Manual hand-offs cause delay & inconsistent configs. - No dashboard for real-time status.
9. Your Solution Automated Flow Designer workflow: employee submits via Service Catalog → auto-routes for manager approval → auto-checks stock → auto-creates fulfilment task or vendor PO → sends status notifications → live dashboard tracks it end-to-end.	10. Channels of Behaviour - Online: Service Catalog portal, email/app notifications, manager approval, dashboard. - Offline: IT helpdesk walk-in, physical laptop handover.

Flow: Automated Standard Laptop Order (IT Procurement - Flow Designer)
