

Functional & Performance Testing Template

Model Performance Test

Date	28 September 2026
Team ID	6ab2210011b716a3e52c62c6
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Form Input Validation (e.g., employee details, laptop model)	Enter valid and invalid values in all required input fields	Valid inputs accepted; clear errors shown for invalid or missing inputs	Valid data accepted; invalid/missing data displayed validation errors.	PASS
FT-02	Laptop Configuration Validation (e.g., model, quantity, specifications)	Enter values within and outside the permitted range	Accepts valid values and shows an error for invalid or out-of-range values	Valid laptop configuration accepted; invalid values displayed an error.	PASS
FT-03	Standard Laptop Order Creation	Select the standard laptop option, enter required details, and submit the order	Order is created successfully with the correct laptop and requester details	Standard laptop order created successfully with correct requester and laptop details.	PASS
FT-04	Flow Designer Automation Check	Submit a valid laptop order and verify the configured Flow Designer flow	Flow triggers automatically and performs the configured approval/procurement actions	Flow triggered automatically and completed the configured procurement actions.	PASS
FT-05	Approval Workflow Test	Create an order requiring approval and	Approval request is generated and	Approval request generated	PASS

		verify the approval step	the order moves to the correct next stage	successfully and moved to the next workflow stage.	
PT-01	Response Time Test	Use a timer to measure order submission and flow execution time	Standard order processing should complete within the defined target time	Order submission and flow execution completed within the defined target time.	PASS
PT-02	Concurrent Order Test	Submit multiple standard laptop orders at the same time	System should process requests without significant slowdown or failure	Multiple orders processed successfully without significant slowdown or failure.	PASS
PT-03	Load Test	Process multiple laptop orders and verify Flow Designer execution under load	System should continue working smoothly without crashing or losing requests	Multiple orders processed smoothly without crashing or losing requests.	PASS
