

8. PROJECT DEMONSTRATION PHASE

Project Title

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Introduction

The Project Demonstration Phase is the final phase of the project, where the developed ServiceNow solution is demonstrated to show its working process and expected results. The project demonstrates the automation of standard laptop procurement using ServiceNow Flow Designer. The demonstration explains how a user places a Standard Laptop request, how the request is approved, and how a Catalog Task is automatically created and assigned to the Hardware group.

Demonstration Process

The project demonstration is carried out through the following steps:

1. Open ServiceNow and access the Service Catalog.
2. Select Hardware from the Service Catalog.
3. Select Standard Laptop.
4. Click Order Now to place the laptop request.
5. Open the request and check the Order Status.
6. Open the Request Number to view the Requested Item record.
7. Open the Approvers section and approve the request.
8. Open the Requested Item section.
9. Scroll down to the Catalog Tasks section.
10. Open the Catalog Task to verify the updated Short Description and Assignment Group.
11. The Catalog Task is created with the description "Laptop need to Configured" and assigned to the Hardware group.

Demonstration Result

The demonstration confirms that the Standard Laptop request is processed through the automated Flow Designer workflow. After approval, the required Catalog Task is generated automatically and assigned to the Hardware team for laptop configuration. This reduces manual intervention and helps ensure timely processing of standard laptop requests.

Conclusion

The Project Demonstration Phase successfully presents the complete working of the ServiceNow automation project. The demonstration shows that Flow Designer can automate the standard laptop procurement process by creating and assigning the required Catalog Task after approval. This provides a streamlined procurement process, reduces manual overhead, and improves the efficiency of IT operations.
