

Scalability & Future Plan

Date	28 September2026
Team ID	6ab2210011b716a3e52c62c6
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Currently automated only for Standard Laptop requests	Other hardware/software catalog items still require manual task creation	High
2	Basic error handling in the flow	Flow may fail silently if required fields are missing or incorrectly mapped	Medium
3	No automated escalation if the Catalog Task is not actioned in time	Delay in laptop configuration if the Hardware team does not respond	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Handles single catalog item (Standard Laptop) requests	Extend the flow to cover all hardware catalog items using reusable subflows
2	Data Storage	Uses standard ServiceNow tables (sc_request, sc_task)	No major change needed; leverage existing ServiceNow database scalability
3	Performance	Flow runs synchronously for each request	Move heavier actions to asynchronous flow execution for faster response
4	Security	Basic role-based access via existing ServiceNow ACLs	Add stricter ACL checks and approval audit logging for compliance

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Extend automation to all Hardware catalog items (monitors, keyboards, etc.)	1 month	Reduces manual task creation across all hardware requests

Phase 2	Add advanced error handling and validation in the flow	2 months	Improves reliability and reduces failed flow executions
Phase 3	Add SLA-based escalation and reminder notifications	3 months	Ensures faster turnaround on Catalog Tasks
Phase 4	Integrate with vendor/procurement systems for auto-ordering	6 months	Enables end-to-end procurement automation
