| Date          | 28 September 2026                                                                 |
| Team ID       | 6ab2210011b716a3e52c62c6                                                          |
| Project Name  | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks |                                                                                   |

### Model Performance Testing:

Project team shall fill the following information in model performance testing template.

| S.No. | Parameter                    | Values                                                                                                                                                                                                                                              | Screenshot                                                                            |
|-------|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| 1     | Model Summary                | Flow Designer flow: "Standard Laptop Order Automation"<br>Trigger: Service Catalog request item created for Standard Laptop<br>Actions: Get catalog variables → Approval (Manager) → Create Procurement Task → Notify requester → Update RITM state |   |
| 2     | Accuracy                     | Training Accuracy - [e.g., 100% of test requests triggered the flow]<br>Validation Accuracy - [e.g., 95% flow executions completed successfully]                                                                                                    |  |
| 3     | Fine Tuning Result( if Done) | Validation Accuracy - [e.g., 98% after adding error handling, approval timeout and retry logic]                                                                                                                                                     |  |
