| Date          | 28 September 2026                                                                 |
| Team ID       | 6ab2210011b716a3e52c62c6                                                          |
| Project Name  | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks | 10 Marks                                                                          |

#### Model Performance Testing:

Project team shall fill the following information in model performance testing template.

| S.No. | Parameter               | Screenshot / Values                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.    | Data Rendered           | <p>Data generated by the flow: Catalog Task created with short description and Hardware assignment group.</p>  <p>The screenshot shows two parts of the ServiceNow interface. The top part is a 'Catalog Task' form for item 'SCTASK0010001'. It includes fields for 'Number', 'Assigned to', 'Configuration item', 'Active' checkbox, 'Short description' (Laptop needs to be Configured), 'Description' (Laptop needs to be Configured), and 'Worknotes'. The bottom part is a 'Standard Laptop task' flow configuration in Flow Designer. It shows an action 'Create Catalog Task' with a table name 'Catalog Task [cat_task]'. The 'Trigger' is set to 'Trigger on Requested Item'. The 'Short Description' is 'Laptop needs to be Configured'. The 'Fields' section shows 'Description' (Laptop needs to be Configured), 'Assignment group' (Hardware), and 'Approval' (Approved).</p> |
| 2.    | Data Preprocessing      | Not applicable - this project uses ServiceNow Flow Designer automation, not Tableau.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 3.    | Utilization of Filters  | Not applicable - this project uses ServiceNow Flow Designer automation, not Tableau.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 4.    | Calculation fields Used | Not applicable - this project uses ServiceNow Flow Designer automation, not Tableau.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 5.    | Dashboard design        | No of Visualizations / Graphs - 0 (Not applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
